

StayNLearn PreSchool

StayNPlay provides a daily preschool program, without the commitment required at conventional child care centers. Attendance is truly drop-in, meaning your child may attend any day or days of the week, to suit your schedule.

Our preschool curriculum is offered Monday through Friday, from 9:00am-12:30pm. Our goal is for your preschool child to grow with us at StayNPlay while building and developing all the necessary skills to succeed for years to come.

Great for all children, ages Toddler - Pre K.

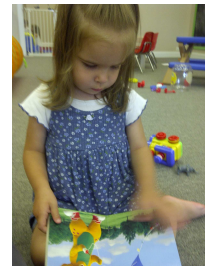

Curriculum

At the heart of any successful program is a curriculum foundation that not only effectively meets a full range of outcomes and objectives, but also supports teachers in a way that allows them to confidently provide new and exciting learning opportunities every day. HighReach Learning supports and inspires educators from a variety of educational backgrounds by providing meaningful learning experiences and support materials that promote active, playful, and authentic learning opportunities.

HighReach Learning's ultimate goal is for children to become competent, eager learners. Our high-quality curriculum for children up to five years of age provides many opportunities for active exploration, creating powerful and positive interactions for learning.

The HighReach Learning Curriculum Approach is based upon the following principles:

- A child's development is continuous, individual, and begins at birth.
- The stages of development are unique to each child.
- Creating multiple connections supports current brain research for how young children learn.
- Interactions and relationships are at the heart of learning.
- Families are truly a child's first teachers and are an integral part of the learning community.
- Learning experiences are purposeful, interactive, meaningful, relevant, active, and playful.
- Curriculum is project-focused and is based in play investigation. Play is the avenue for child investigations.
- The ultimate goal is for children to become ready, able, competent, and eager learners.

What can I expect my child to be doing with StayNPlay's HighReach Learning curriculum program?

Experiences within HighReach Learning curriculum cover all areas of learning, including language development, emerging literacy, math, science, creativity and the arts, social skills, physical development, reasoning, problem solving, and more.
